# Pushbutton Switch

### Install in 22-dia. or 25-dia. Panel Cutout

- Easy mounting and removal of Switch Unit.
- · Increase wiring efficiency with three-row mounting of Switch Blocks.
- Finger protection mechanism on Switch Unit provided as a standard feature.
- Use 25-dia. ring to install in 25-dia. panel cutouts.
- Mounted using either open-type (fork-type) or closed-type (round-type) crimp terminals.
- Wide range of shapes and colors.
- IP65 oil resistance (non-lighted models) IP65 (lighted models)
- EN60947-5-1

## **Model Number Structure**

## Model Number Legend **Completely Assembled**

Shipped as a set which includes the Pushbutton, Lamp (lighted type only), and Switch.

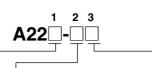

## *B1 B1*

## **Subassembled**

The Pushbutton, Lamp, or Switch can be ordered separately. Use them in combination for models that are not available as assembled Units. These can also be used as inventory for maintenance parts.

### 1. Pushbutton

Note: 1. Rated current values are determined according to the testing conditions. The above ratings were obtained by conducting tests under the following conditions.

- (1) Ambient temperature: 20°±2°C
   (2) Ambient humidity: 65±5%
- (3) Operating frequency: 20 operations/minute
- 2. Minimum applicable load: 10 mA at 5 VDC

### **Contacts (Microload)**

| Rated applicable load           | Minimum applicable load |
|---------------------------------|-------------------------|
| 50 mA at 5 VDC (Resistive load) | 1 mA at 5 VDC           |

### LED Indicators without Voltage **Reduction Unit**

| Rated voltage | Rated current | Operating voltage |  |  |
|---------------|---------------|-------------------|--|--|
| 6 VDC         | 60 mA (20 mA) | 6 VDC±5%          |  |  |
| 6 VAC         | 60 mA (20 mA) | 6 VAC/VDC±5%      |  |  |
| 12 VAC/VDC    | 30 mA (10 mA) | 12 VAC/VDC±5%     |  |  |
| 24 VAC/VDC    | 15 mA (10 mA) | 24 VAC/VDC±5%     |  |  |

Note: Values in parentheses are for blue Pushbuttons.

### Super-bright LED Indicator

| Rated voltage | Rated current | Operating voltage |
|---------------|---------------|-------------------|
| 24 VAC/VDC    | 15 mA         | 24 VAC/VDC ±5%    |

### Incandescent Lamp

| Rated voltage | Rated current | Operating voltage |  |
|---------------|---------------|-------------------|--|
| 6 VAC/VDC     | 200 mA        | 5 VAC/VDC         |  |
| 14 VAC/VDC    | 80 mA         | 12 VAC/VDC        |  |
| 28 VAC/VDC    | 40 mA         | 24 VAC/VDC        |  |
| 130 VAC/VDC   | 20 mA         | 100 VAC/VDC       |  |

### **Voltage-reduction Lighting**

| Rated voltage | Operational voltage | Applicable lamp<br>(BA8S/13□ gold) |  |
|---------------|---------------------|------------------------------------|--|
| 110 VAC       |                     | LED Lamp                           |  |
| 220 VAC       | 190 to 230 VAC      | (A22-24A□)                         |  |

## Nomenclature

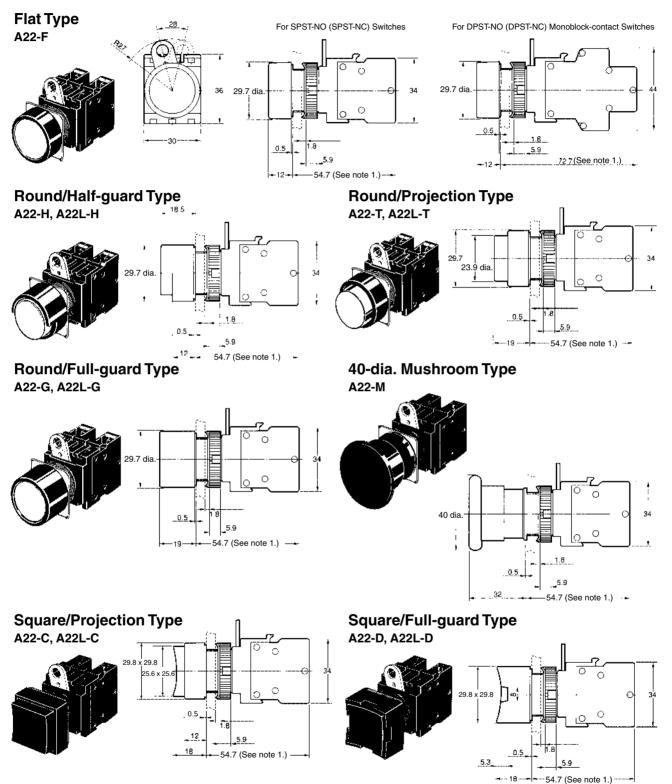

## Dimensions

Note: 1. All units are in millimeters unless otherwise indicated.

2. The following illustrations are for momentary operation.

## Lighted/Non-lighted Pushbutton Switches

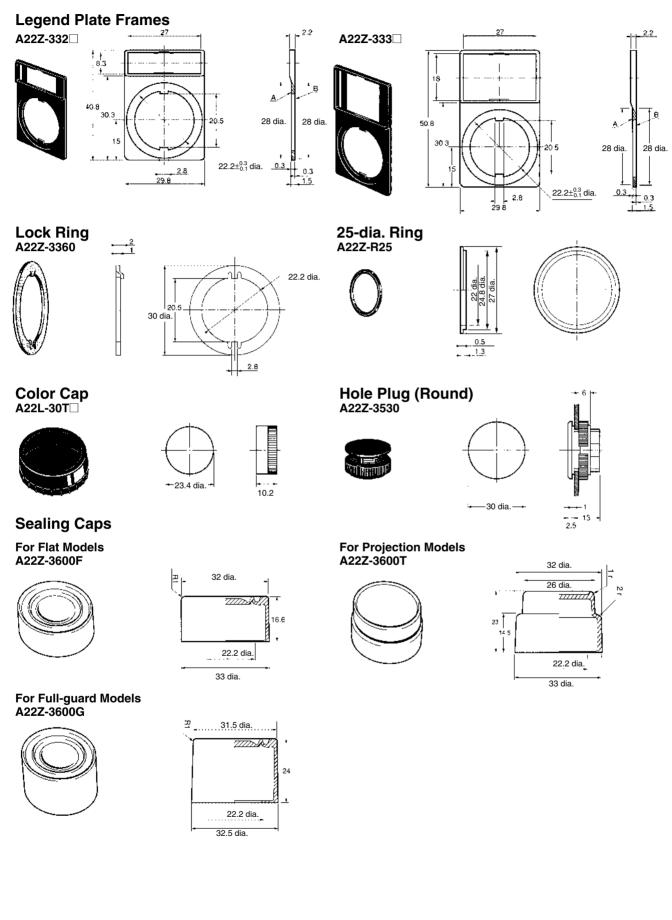

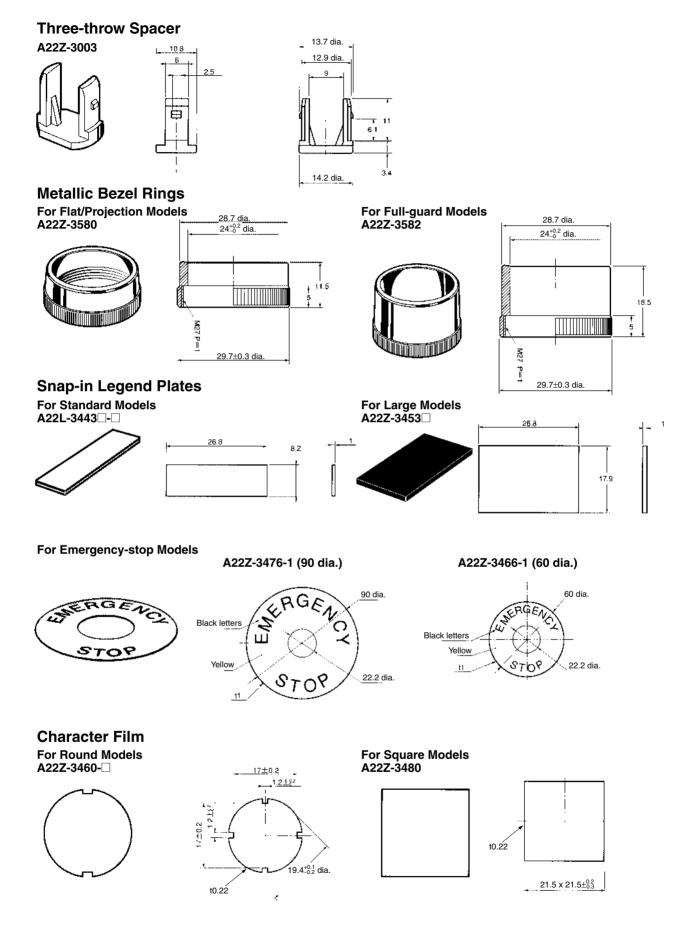

Note: 1. Alternate operation models are 9.3 mm longer.

2. Lighted models have the same dimensions as shown above, whether they are with or without Voltage Reduction Units.

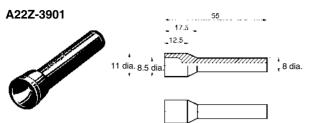

## Accessories

Note: All units are in millimeters unless otherwise indicated.

| Lighted with Voltage Re-<br>duction Unit (SPST-NO<br>+ SPST-NC)  | Bottom view   |

## ■ Panel Cutouts

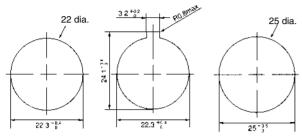

- Note: 1. When applying coating such as paint to the panel, the dimensions should be those after the application of coating. Lock ring is provided as a standard item.
  - 2. Recommended panel thickness: 1 to 5 mm.
  - 3. Use an A22Z-R25 Ring when mounting to a panel with 25-mm holes.

### Common to A22, A22S/W, A22K, M22, and A22E

## ■ Mounting to the Panel

### Panel Hole Dimensions

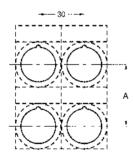

For 25-dia. holes, always use 25-dia. Rings. (Since the cutout dimensions are large, IP65 cannot be guaranteed unless 25-dia. Rings are used.)

If outer surface treatment such as coating is performed for the panel, the panel dimensions after outer surface treatment must meet the specified panel dimensions.

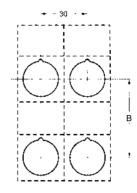

Note: Recommended panel thickness: 1 to 5 mm.

### **Matrix Installation**

1. The following panel hole dimensions apply when Switch Unit and the Standard-size Legend Plate Frame and Lock Ring are mounted, and lead wires are connected directly to the Switch Block.

**2.** The following panel hole dimensions apply when the Large-size Legend Plate Frame is mounted, and when crimp terminals are connected to the Switch Block terminals.

Pitches A and B between the centers of the mounting holes are as follows:

For 1. above:

| Switch Blocks  | Α          |
|--|------------|
| A22-10, A22-10S, A22-01, A22-01S                     | 45 mm min. |
| A22-20, A22-20S, A22-02, A22-02S, A22-11,<br>A22-11S | 55 mm min. |

For 2. above:

| Type of crimp<br>terminal          | Switch Blocks  | В          |
|------------------------------------|--|------------|
| Bare crimp termi-<br>nals          | A22-10, A22-10S, A22-01,<br>A22-01S                  | 51 mm min. |
|                                    | A22-20, A22-20S, A22-02,<br>A22-02S, A22-11, A22-11S | 61 mm min. |
| Crimp terminals<br>with insulating | A22-10, A22-10S, A22-01,<br>A22-01S                  | 60 mm min. |
| sheath                             | A22-20, A22-20S, A22-02,<br>A22-02S, A22-11, A22-11S | 70 mm min. |

**Note: 1.** The above dimensions are the minimum dimensions for when the wires described under *Applicable Wire Size* on page 106 are used. If a different wires are used, the wiring dimensions may be different so determine an appropriate pitch before setup.

- 2. With pushbuttons of external dimensions greater than 30 mm, set the pitch according to the dimensions. (When using matrix installation for the A22-M□, mount with a pitch of 40 mm instead of 30 mm in the diagram above.)
- **3.** When using a pushbutton with external dimensions exceeding 30 mm, use a pitch appropriate for the pushbutton.

## Mounting the Operation Unit on the Panel

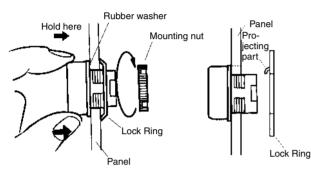

Insert the Operation Unit (Pushbutton, etc.) from the front surface of the panel, insert the Lock Ring and the mounting nut from the terminal side, then tighten the nut. Before tightening, check that the rubber washer is present between the Pushbutton Unit and the panel.

When using a Legend Plate Frame, put one rubber washer each between the Legend Plate Frame and the panel and between the Operation Unit and the Legend Plate Frame. (One rubber washer will be provided when one Legend Plate Frame is ordered.)

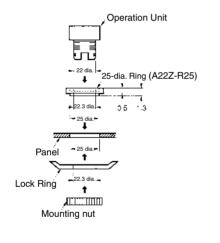

Align the Lock Ring with the groove in the casing, then insert the Lock Ring so that its edge is located on the panel side.

Tighten the mounting nut at a torque of 0.98 to 1.96 N·m.

When using a Lock Ring, replace with the supplied Lock Ring, insert the projecting part into the lock slot, and then tighten the mounting nut.

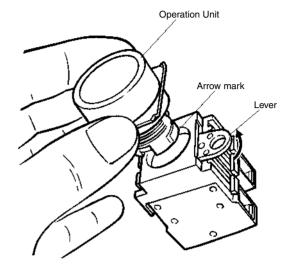

When the panel cutout dimension is 25 dia., remove the supplied rubber washer and mount the 25-dia. Ring as shown below. (Since the A22Z-R25 is not attached to the main body, order separately.)

## Mounting the Switch on the Pushbutton Unit

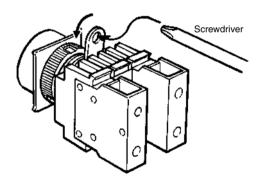

Insert the Pushbutton Unit into the Switch Unit, aligning the arrow mark inscribed on the Case with the lever on the Switch Blocks, then move the lever in the direction indicated by the arrow in the following figure.

### **Removing the Switch**

Move the lever in the direction indicated by the arrow in the following figure, then pull the Pushbutton Unit or the Switch Blocks.

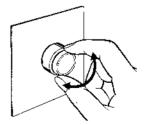

Since the lever has a hole with an inside diameter of 6.5 mm, the lever can be moved in the specified direction by inserting a screwdriver into the hole and then moving the screwdriver.

## Mounting/Replacing the Color Cap

### Projection, Fall-guard

Grip and rotate the Color Cap with your fingers.

## Half-guard Indicators

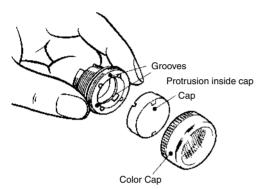

Put the tips of the Cap Tightening Tool (A22Z-3908) into the Color Cap slot and turn the Tool.

# O S

## Assembling the Cap

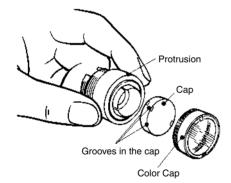

## **Lighted Pushbutton Switch**

Mount the Color Cap so that the protrusions inside the cap fit into the grooves in the Pushbutton Unit.

### **Indicator**

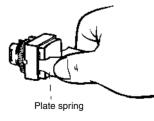

Mount the Color Cap so that the protrusions inside the Pushbutton Unit fit into the grooves in the cap.

### Square Pushbutton/Indicator

Removing the Color Cap:

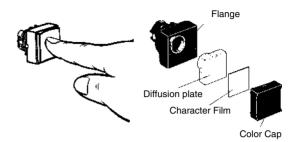

Insert the protruding tip of the Cap Puller (A3PJ-5080) into the Cap slot, hold the plate spring, and pull them to remove the Color Cap.

Mounting the Color Cap:

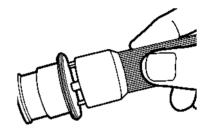

Mount the Color Cap on the flange and firmly push the Color Cap. When the Color Cap is inserted, check whether it operates properly. When replacing the Lamp, remove the Color Cap and diffusion plate with fingers or Cap Puller.

Attach the Character Film properly so that it fits inside the protruding part of the diffusion plate. Then, match the diffusion plate to the square flange and insert the Cap.

## **Emergency Stop Switch**

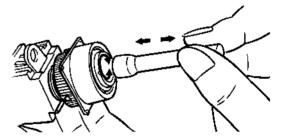

Insert the protrusion of the Tightening Wrench (A22Z-3905) into the Cap slot and then turn to remove the Cap.

## ■ Installing/Replacing the Lamp

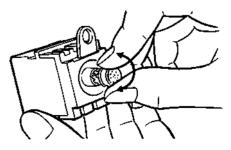

### Installing/Replacing from the Panel Surface

Insert the Lamp Extractor (A22Z-3901) into the lamp, then rotate the Extractor while pressing it.

### Installing/Replacing on the Switch

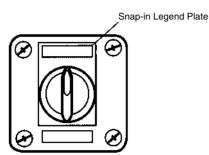

Grip the indicator with your fingers, then rotate the indicator while pressing it against the Switch.

## Control Box (Enclosure)

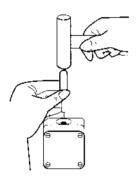

### Mounting the Switch

The Standard-size Legend Plate Frame can be mounted. Mount the Frame as shown in the following diagram. Mount the Switch in the same way as for an ordinary panel.

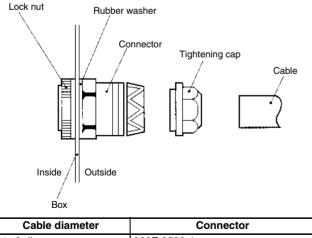

### Creating a Cable Port Hole

Place the tip of a screwdriver on the surface where the cable port hole is to be created with the cover attached and strike the screwdriver to punch a hole. Attempts to punch a hole on the other side of the case will damage the Box.

### **Securing the Connector Cable**

- 1. Insert the connector into the cable port hole in the Box and secure with the fixing nut inside the box.
- 2. Open a hole in the thin rubber section of the rubber ring.
- **3.** Pass the tightening cap through the cable, insert the cable into the connector, and tighten the hexagonal nut to secure the cable.

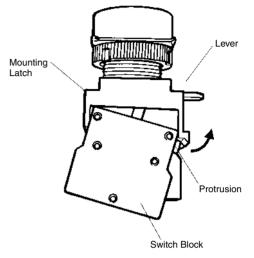

| Cable diameter | Connector   |
|----------------|-------------|
| 7 to 9 dia.    | A22Z-3500-1 |
| 9 to 11 dia.   | A22Z-3500-2 |

## Installing/Removing the Switch Blocks

## Installing the Switch Blocks

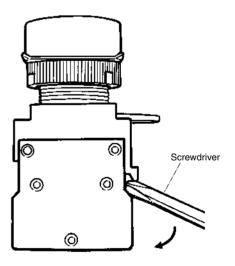

Hook the small protrusion on the Mounting Latch into the groove on the other side of the lever, then push up the Switch Block in the direction indicated by the arrow in the figure below.

## **Removing the Switch Blocks**

Insert a screwdriver between the Mounting Latch and the Switch Block, then push down the screwdriver in the direction indicated by the arrow in the following figure.

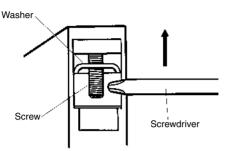

| Use                     | e either of the following screwdrivers. |
|-------------------------|---|
| Flat-head screwdriver   | 3 to 6 mm                               |
| Phillips<br>screwdriver | 3 to 6 m/m 🧲 🔨                          |

## ■ Wiring

## Wiring Round Crimp Terminals

Loosen the terminal screw from the Switch Unit until it completely comes off the groove, insert a screwdriver as shown in the following figure, then push up the washer in the direction indicated by the arrow to temporarily secure it. Now, a round crimp terminal can be connected. After inserting the terminal, tighten the screws to complete wiring.

## Engraving

Engrave the characters on the surface on the Cap. Make sure that the characters are aligned parallel to the imaginary line connecting the two protruding portions to the left and right of the Cap.

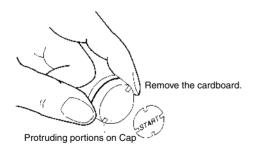

The characters must not be engraved deeper than 0.5 mm. Apply an alcohol-based paint coating, such as melamine, alkyd, or acrylic resin paint coating, to the engraved characters.

Protruding portions on Cap

## ■ Affixing Character Film

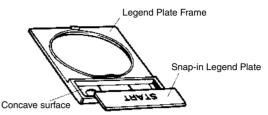

Hold the Cap, remove the cardboard on the Film, and attach the Film to the Cap. Make sure that the protruding portions of the Cap engage the cutout portions of the Film and that the characters are aligned parallel to the imaginary line connecting the two protruding portions to the left and right of the Cap.

## Mounting and Dismounting Snap-in Legend

Press and secure the Snap-in Legend Plate onto the Legend Plate Frame.

The direction of the characters will vary with the mounting direction of the control panel if the Switch is a knob or key selector model.

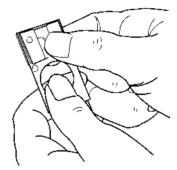

To easily remove the Snap-in Legend Plate from the Legend Plate Frame mounted to the panel, insert a Tool with a thin tip into the space between the Snap-in Legend Plate and the Legend Plate Frame.

The Snap-in Legend Plate is easily removed by pressing the Snap-in Legend Plate from the back of the Legend Plate Frame.

The Legend Plate Frame is made of acrylic resin, which is easily damaged by shock. Be sure to handle the Legend Plate Frame with care.

## Engraving Method

### Material: Acrylic

Engrave the characters directly on the matted side of the Snap-in Legend Plate.

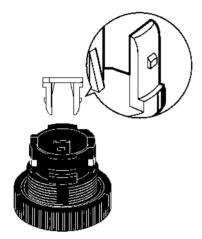

The characters must be engraved no deeper than 0.5 mm.

Apply alcohol-based paint coating to the engraved characters.

If the Snap-in Legend Plate is transparent, engrave the mirror-written characters on the back of the Snap-in Legend Plate and apply paint coating to the characters. Then apply paint coating of a different color to the remaining part of the Snap-in Legend Plate.

## Mounting Three-throw Spacer (A22Z-3003)

Press and secure the two protruding portions of the Three-throw Spacer to the two indented portions of the inner side of the control panel.

### Common to A22, A22S/W, A22K, M22, and A22E

### 

Do not apply a voltage between the incandescent lamp and the terminal that is greater than the rated voltage. If the incandescent lamp is broken, the Operation Units may pop out.

Always turn OFF the power and wait for 10 minutes before replacing the incandescent lamp. If the lamp is replaced immediately after the power is turned OFF, the remaining heat may cause burns.

## Correct Use

## Mounting

Always make sure that the power is turned OFF before mounting, removing, or wiring the Switch, or performing maintenance.

Do not tighten the mounting ring more than necessary using tools such as pointed-nose pliers. Doing so will damage the mounting ring. The tightening torque is 0.98 to 1.96 N·m.

Recommended panel thickness: 1 to 5 mm.

## <u>Wiring</u>

After wiring the Switch, maintain an appropriate clearance and creepage distance.

When DC-specific LEDs are used, wire the Switch so that the X1 terminal is positive.

Terminal screws must be Phillips or slotted M3.5 screws with a square washer.

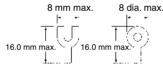

The tightening torque is 1.08 to 1.27 N·m.

Single wires, stranded wires, and crimp terminals can be connected to the Switch.

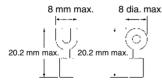

### Applicable Wire Size

Stranded wire: 2 mm<sup>2</sup> max. Solid wire: 1.6 dia. max.

### **Bare Crimp Terminals**

### **Crimp Terminals with Insulating Sheath**

## **Operating Environment**

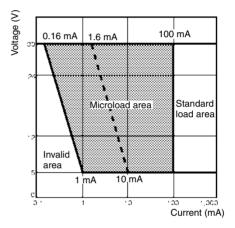

The IP65 model is designed with a degree of protection so that it will not sustain damage if it is subjected to water from any direction to the front of the panel.

## Using the Microload

Insert a contact protection circuit, if necessary, to prevent the reduction of life expectancy due to extreme wear on the contacts caused by loads where inrush current occurs when the contact is opened and closed.

The minimum applicable load is the N-level reference value. This value indicates the malfunction reference level for the reliability level of 60% ( $\lambda$  60) (conforming to JIS C5003).

The equation,  $\lambda$  60 = 0.5 x 10<sup>-6</sup>/operations indicates that the estimated malfunction rate is less than 1/2,000,000 operations with a reliability level of 60%.

### LED

The LED current-limiting resistor is built-in, so internal resistance is not required.

If commercially available LEDs are used, select the ones that meet the following conditions:

Base: BA9S/13

Overall length: 26 mm max.

Power consumption: 2.6 W max.

### **Others**

If the panel is to be finished with coating, etc., make sure that the panel meets the specified dimensions after the coating.

Do not subject the Switch to extreme shock or vibration. Doing so will cause malfunctions and damage to the Switch.

### ALL DIMENSIONS SHOWN ARE IN MILLIMETERS.

To convert millimeters into inches, multiply by 0.03937. To convert grams into ounces, multiply by 0.03527.
